Subject index

Adsorption rates,
characterization of rates of adsorption with fast-scan cyclic voltammetry (Stamford et al.) 291
Albumin,
kinetics of ——— and fibrinogen adsorption onto a rotating disk electrode. Effect of temperature, concentration and material (Bernabeu et al.) 261
Alkenes,
electrocatalytic oxidation of ——— by manganese tetrakis(*N*-methyl-4-pyridyl)porphine in aqueous solutions (Lin, Su) 305
Amines,
indirect anodic oxidation of ——— mediated by brominated aryl amines (Pletcher, Zappi) 203
Amorphous alloy electrocatalysts,
scanning tunneling microscopy of ——— for water electrolysis (Kreysa et al.) 67
Anion exchange polymers,
electronically conductive ——— based on polypyrrole. Preparation, characterization, electrostatic binding of ferrocyanide and electrocatalysis of ascorbic acid oxidation (Mao, Pickup) 127
Ascorbic acid,
electronically conductive anion exchange polymers based on polypyrrole. Preparation, characterization, electrostatic binding of ferrocyanide and electrocatalysis of ——— oxidation (Mao, Pickup) 127

Bimetallic alloys,
probing the surface electrochemical properties of ——— by chemisorption of redox-active species. Iodine at smooth $Au_{90}Pt_{10}$ (Cali et al.) 117
Brominated aryl amines,
indirect anodic oxidation of amines mediated by ——— (Pletcher, Zappi) 203

Carbon,
determination of the heterogeneous electron-transfer rate constants for the redox couples $Mo(CN)_8^{4-/3-}$, $W(CN)_8^{4-/3-}$, $Fe(CN)_6^{4-/3-}$, $Os(CN)_6^{4-/3-}$ and $IrCl_6^{3-/2-}$ using fast sweep cyclic voltammetry at ——— fibre electrodes (Oyama et al.) 297
Electrochemical polarization of activated ——— and graphite powder suspensions. Part III. Charge transfer during single collisions and contact resistance (Kastening et al.) 77
Cation/neutral couples,
thermodynamics of partitioning for ——— within perfluorosulfonate films (Van Ryswyk et al.) 317
Charge transfer,
electrochemical polarization of activated carbon and graphite powder suspensions. Part III. ——— during single collisions and contact resistance (Kastening et al.) 77
Hydrogen evolution reaction on metals and semiconductors: intermediate species and partial ——— sequence (Lorenz) 159
Chronoamperometry,
extraction of heterogeneous kinetic parameters from combined chronoamperometric and chronocoulometric data by a multiple regression procedure (Barbero et al.) 23
Chronocoulometry,
extraction of heterogeneous kinetic parameters from combined chronoamperometric and chronocoulometric data by a multiple regression procedure (Barbero et al.) 23
Chronopotentiometry,
——— from three-dimensional normal pulse polarography of reversible systems (Anderson et al.) 283
——— with power-law perturbation functions at an expanding plane electrode with and without a preceding blank period for systems with a coupled first-order homogeneous chemical reaction (Kant, Rangarajan) 39

Cold fusion,
examination of nuclear measurement conditions in ——— experiments (Abriola et al.) 355
Compact layer,
comment on the paper: "On the anomalously high and negative values of the ——— capacity in some new models of the metal/electrolyte interface" by Z.B. Kim, A.A. Kornyshev and M.B. Partenskii (Schmickler, Henderson) 11
On the anomalously high and negative values of the ——— capacity in some new models of the metal/electrolyte interface (Kim et al.) 1
Contact resistance,
electrochemical polarization of activated carbon and graphite powder suspensions. Part III. Charge transfer during single collisions and ——— (Kastening et al.) 77
9-Cyanoanthracene groups,
redox behaviour of a poly(pyrrole) modified electrode where the pyrrole has *N*-substituted ——— (Grimshaw, Perera) 335
Cyclic voltammetry,
characterization of rates of adsorption with fast-scan ——— (Stamford et al.) 291
Resistance-induced peaks in cyclic voltammograms of systems that can be switched electrochemically between an insulating and conductive state (Gottesfeld et al.) 15

α-Dibromobenzyl derivative,
electrodes modified by a Ni–dibenzotetraaza [14]annulene complex via reductive electropolymerization of an ——— or a dipyrrole derivative (Deronzier, Marques) 341
Dichloromethane,
electrochemical studies of μ-oxo-bis[bis(dibenzyldithiocarbamato)oxomolybdenum(V)] in ——— (Unoura et al.) 311
Dipyrrole derivative,
electrodes modified by a Ni–dibenzotetraaza-[14]annulene complex via reductive electropolymerization of an α-dibromobenzyl derivative or a ——— (Deronzier, Marques) 341

Electrochemical cell,
——— design for in-situ IR study of reactions involving high electric current and gas evolution (Zhang et al.) 329
Electro-electrodialysis,
electro-transport of sulphuric acid by ——— (Cherif, Gavach) 143
Electron transfer,
determination of the heterogeneous ——— rate constants for the redox couples $Mo(CN)_8^{4-/3-}$, $W(CN)_8^{4-/3-}$, $Fe(CN)_6^{4-/3-}$, $Os(CN)_6^{4-/3-}$ and $IrCl_6^{2-/3-}$ using fast sweep cyclic voltammetry at carbon fibre electrodes (Oyama et al.) 297
Ester-substituted phenols,
in-situ investigation by multiple internal Fourier transform infrared spectroscopy (MIRFTIRS) of the film growth process and the polymer chain orientation during electropolymerization of ——— on iron in the absence and presence of hexamethylenediamine (HMDA) (Pham et al.) 247
Expanding plane electrode,
chronopotentiometry with power-law perturbation functions at an ——— with and without a preceding blank period for systems with a coupled first-order homogeneous chemical reaction (Kant, Rangarajan) 39

Ferri/ferrocyanide,
determination of the heterogeneous electron-transfer rate constants for the redox couples $Mo(CN)_8^{4-/3-}$, $W(CN)_8^{4-/3-}$, ——— $Os(CN)_6^{4-/3-}$ and $IrCl_6^{2-/3-}$ using fast sweep cyclic voltammetry at carbon fibre electrodes (Oyama et al.) 297
Ferrocyanide,
electronically conductive anion exchange polymers based on polypyrrole. Preparation, characterization, electrostatic binding of ——— and electrocatalysis of ascorbic acid oxidation (Mao, Pickup) 127
Fibrinogen,
kinetics of albumin and ——— adsorption onto a rotating disk electrode. Effect of temperature, concentration and material (Bernabeu et al.) 261
Film growth,
in-situ investigation by multiple internal Fourier transform infrared spectroscopy (MIRFTIRS) of the ——— process and the polymer chain orientation during electropolymerization of ester-substituted phenols on iron in the absence and presence of hexamethylenediamine (HMDA) (Pham et al.) 247

Fusion,
examination of nuclear measurement conditions in cold ——— experiments (Abriola et al.) 355

Gold,
probing the surface electrochemical properties of bimetallic alloys by chemisorption of redox-active species. Iodine at smooth $Au_{90}Pt_{10}$ (Cali et al.) 117

Graphite,
electrochemical polarization of activated carbon and ——— powder suspensions. Part III. Charge transfer during single collisions and contact resistance (Kastening et al.) 77

Hexamethylenediamine,
in-situ investigation by multiple internal Fourier transform infrared spectroscopy (MIRFTIRS) of the film growth process and the polymer chain orientation during electropolymerization of ester-substituted phenols on iron in the absence and presence of ——— (HMDA) (Pham et al.) 247

Hydrogen,
anomalous temperature dependence of the ——— evolution reaction on iron (Vračar, Dražić) 171
Comparative study of the underpotential deposition of two monovalent cations, Tl^+ and H^+, on Pt (111) as a way to the interpretation of the unusual adsorption states (Clavilier et al.) 231
——— evolution reaction on metals and semiconductors: intermediate species and partial charge transfer sequence (Lorenz) 159

Iodine,
probing the surface electrochemical properties of bimetallic alloys by chemisorption of redox-active species. ——— at smooth $Au_{90}Pt_{10}$ (Cali et al.) 117

Iridium chloride,
determination of the heterogeneous electron-transfer rate constants for the redox couples $Mo(CN)_8^{4-/3-}$, $W(CN)_8^{4-/3-}$, $Fe(CN)_6^{4-/3-}$, $Os(CN)_6^{4-/3-}$ and ——— using fast sweep cyclic voltammetry at carbon fibre electrodes (Oyama et al.) 297

Iron,
anomalous temperature dependence of the hydrogen evolution reaction on ——— (Vračar, Dražić) 171
In situ investigation by multiple internal Fourier transform infrared spectroscopy (MIRFTIRS) of the film growth process and the polymer chain orientation during electropolymerization of ester-substituted phenols on ——— in the absence and presence of hexamethylenediamine (HMDA) (Pham et al.) 247
Oxygen reduction on ———. Part III. An analysis of the rotating disk–ring electrode measurements in near neutral solutions (Zečević et al.) 179

Kinetic parameters,
extraction of heterogeneous ——— from combined chronoamperometric and chronocoulometric data by a multiple regression procedure (Barbero et al.) 23

Magnesium,
equivalent circuit parameters of the film-covered ———/electrolyte interface in Mg/MnO_2 dry cells from transient and ac impedance measurements (Narayanan, Sathyanarayana) 103

Manganese oxide,
equivalent circuit parameters of the film-covered magnesium/electrolyte interface in Mg/——— dry cells from transient and ac impedance measurements (Narayanan, Sathyanarayana) 103

Manganese tetrakis(*N*-methyl-4-pyridyl)porphine,
electrocatalytic oxidation of alkenes by ——— in aqueous solutions (Lin, Su) 305

Metal/electrolyte interface,
comment on the paper: "On the anomalously high and negative values of the compact layer capacity in some new models of the ———" by Z.B. Kim, A.A. Kornyshev and M.B. Partenskii (Schmickler, Henderson) 11
On the anomalously high and negative values of the compact layer capacity in some new models of the ——— (Kim et al.) 1

N_1-Methylnicotinamide,
electroreduction of the pyridine ring of ——— in basic solutions (Marín Galvín, Rodríguez Mellado) 195

Molybdenum cyanide,
determination of the heterogeneous electron-transfer rate constants for the redox couples ——— $W(CN)_8^{4-/3-}$, $Fe(CN)_6^{4-/3-}$, $Os(CN)_6^{4-/3-}$ and $IrCl_6^{2-/3-}$ using fast

sweep cyclic voltammetry at carbon fibre electrodes (Oyama et al.) 297

Nickel–dibenzotetraaza[14]annulene complex,
electrodes modified by a ——— via reductive electropolymerization of an α-dibromobenzyl derivative or a dipyrrole derivative (Deronzier, Marques) 341

Normal pulse polarography,
Chronopotentiometry from three-dimensional ——— of reversible systems (Anderson et al.) 283

Nuclear measurement conditions,
examination of ——— in cold fusion experiments (Abriola et al.) 355

Octanol,
inhibition of electrode reactions by 1- and 4- ——— at high surface coverages. Effect of the surface dipole potential (Perzatini et al.) 215

Osmium cyanide,
determination of the heterogeneous electron-transfer rate constants for the redox couples $Mo(CN)_8^{4-/3-}$, $W(CN)_8^{4-/3-}$, $Fe(CN)_6^{4-/3-}$, ——— and $IrCl_6^{3-/2-}$ using fast sweep cyclic voltammetry at carbon fibre electrodes (Oyama et al.) 297

μ-Oxo-bis[bis(dibenzyldithiocarbamato)oxomolybdenum(V)],
electrochemical studies of ——— in dichloromethane (Unoura et al.) 311

Oxygen,
——— reduction on iron. Part III. An analysis of the rotating disk–ring electrode measurements in near neutral solutions (Zečević et al.) 179

Perfluorosulfonate,
thermodynamics of partitioning for cation/neutral couples within ——— films (Van Ryswyk et al.) 317

Perturbation functions,
chronopotentiometry with power-law ——— at an expanding plane electrode with and without a preceding blank period for systems with a coupled first-order homogeneous chemical reaction (Kant, Rangarajan) 39

Phenols,
in-situ investigation by multiple internal Fourier transform infrared spectroscopy (MIRFTIRS) of the film growth process and the polymer chain orientation during electropolymerization of ester-substituted ——— on iron in the absence and presence of hexamethylenediamine (HMDA) (Pham et al.) 247

Platinum,
comparative study of the underpotential deposition of two monovalent cations, Tl^+ and H^+, on ——— (111) as a way to the interpretation of the unusual adsorption states (Clavilier et al.) 231
Probing the surface electrochemical properties of bimetallic alloys by chemisorption of redox-active species. Iodine at smooth $Au_{90}Pt_{10}$ (Cali et al.) 117

Polymer chain orientation,
in-situ investigation by multiple internal Fourier transform infrared spectroscopy (MIRFTIRS) of the film growth process and the ——— during electropolymerization of ester-substituted phenols on iron in the absence and presence of hexamethylenediamine (HMDA) (Pham et al.) 247

Polypyrrole,
electronically conductive anion exchange polymers based on ———. Preparation, characterization, electrostatic binding of ferrocyanide and electrocatalysis of ascorbic acid oxidation (Mao, Pickup) 127
——— film electrodes electrochemically doped with colloidal Prussian Blue (Ikeda, Yoneyama) 323
Redox behaviour of a ——— modified electrode where the pyrrole has *N*-substituted 9-cyanoanthracene groups (Grimshaw, Perera) 335

Prussian Blue,
polypyrrole film electrodes electrochemically doped with colloidal ——— (Ikeda, Yoneyama) 323

Pyridine,
electroreduction of the ——— ring of N_1-methylnicotinamide in basic solutions (Marín Gavín, Rodríguez Mellado) 195

Pyrrole,
redox behaviour of a poly(pyrrole) modified electrode where the ——— has *N*-substituted 9-cyanoanthracene groups (Grimshaw, Perera) 335

Resistance-induced peaks,
——— in cyclic voltammograms of systems that can be switched electrochemically be-

tween an insulating and conductive state (Gottesfeld et al.) 15

Scanning tunneling microscopy,
——— of amorphous alloy electrocatalysts for water electrolysis (Kreysa et al.) 67
Sodium perchlorate,
SERS studies on interfacial water in concentrated ——— solutions (Tian et al.) 277
Sulphuric acid,
electro-transport of ——— by electro-electrodialysis (Cherif, Gavach) 143
Surface dipole potential,
inhibition of electrode reactions by 1- and 4-octanol at high surface coverages. Effect of the ——— (Pezzatini et al.) 215

Thallium,
comparative study of the underpotential deposition of two monovalent cations, Tl^+ and H^+, on Pt (111) as a way to the interpretation of the unusual adsorption states (Clavilier et al.) 231
Three-dimensional normal pulse polarography,
chronopotentiometry from ——— of reversible systems (Anderson et al.) 283
Tungsten cyanide,
determination of the heterogeneous electron-transfer rate constants for the redox couples $Mo(CN)_8^{4-/3-}$, ———, $Fe(CN)_6^{4-/3-}$, $Os(CN)_6^{4-/3-}$ and $IrCl_6^{3-/2-}$ using fast sweep cyclic voltammetry at carbon fibre electrodes (Oyama et al.) 297

Water,
scanning tunneling microscopy of amorphous alloy electrocatalysts for ——— electrolysis (Kreysa et al.) 67
